

**Interview To
Ferdinand Bego**
(Expert Museum of Natural Sciences)

Q: Which are the main problematic ones of Coastal Lagoons in Albania?

A: The main problematic of the Coastal Lagoons in Albania are:

- reduction of the coastal lagoon area
- costal erosion
- pollution and antropication
- limited flow of fresh water into coastal lagoons
- limited communication of water between lagoons and the sea
- unsustainable use of lagoons, resources (Illegal fishing and hunting)
- low environmental awareness or coastal lagoons and wetlands as a whole
- lack of management of coastal lagoons

Museum of Natural Sciences is engaged with Inventory and Monitoring Activity of coastal lagoons.
